

# Relearn 2017 sources

The contents of this folder are some of the digital traces that are left from Relearn 2017. Here you can find all the pads that we used, documents describing the funding received, scripts by the Ransom Headlessness in the Design of Language group, the library of Not-So-Utopian Open-Source Pedagogies, photographs of the week, a list of all the XMPP users, the bots that we shared the chatrooms with, the website files, and lastly the remains of the documents in which the tracks were prepared.
